IS300—Ethical and Societal Implications of Technology Final Term Project

IS400—Managing a Secure Enterprise Final Term Project

Assessment Methods: Evaluation Process

What process was used to evaluate the artifacts student learning, and by whom? Please identify the tools(s), (e.g. a rubric) used in the process and include them in/with this report.

Instructors have uploaded artifacts with the appropriate rubric via canvas. The format of the class was 8-week module, each module contained a discussion, quiz, assignment. There were also weekly hands-on activities. In each course, there was a final project or final research project. The final project applied all the concepts t

IS300 – 32 Students- Course was taught online in an asynchronous mode. There was no difference in teaching modality to note.

IS400 – 3 Students- Course was taught online in an asynchronous mode. There was no difference in teaching modality to note

SLO1 & SLO2

In both courses, instructors designed artifacts to analyze real world scenarios and case studies that mimic real business problems. Students researched solutions, designed plans, and implemented secured ethical solutions
